

## product info

[Compazo Concrete](#)  
[Care & Maintenance](#)  
[Installation](#)  
[Warranty](#)

### material

- A composite material made from stone, resin and color pigments.
- Compazo uses a high strength resin binder that makes a product which is much stronger than traditional concrete, and impervious to cracking or crazing after installation.
- Each piece is hand crafted by artisans, finished to perfection, and made in America.

### colors

- Cool colors that go all the way through the material
- Sample should be used for a general guideline
- Color variations, casting marks, and aggregate shadows will vary in each piece.
- Exact color or texture matches cannot be guaranteed.

### finishes

- Compazo concrete is **permanently coated** and polished to a satin finish.
- Unlike traditional concrete, you **never** have to annually re-coat with a sealer or apply wax to this surface.
- Minor surface and color imperfections are part of the concrete patina.

### performance

#### **Stain Resistance**

The surface is impervious to common stains such as red wine, mustard, coffee, makeup, perfume, cologne, and other household items that can typically stain counter surfaces.

#### **Scratch and Heat Resistance**

Although Compazo concrete has a tough durable surface that holds up well under normal use, we do not recommend cutting, dragging sharp objects, or resting hot combs directly on the surface.

#### **Care and Maintenance**

Compazo concrete is easy to clean with Windex or other ammonia based cleaners.
